Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3748

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24-29 are rejected under 35 U.S.C. 102(b) as being anticipated by CA 1274399. CA 1274399 discloses a system for reducing the pressure in a gas pipeline (carrier line) and using the energy for other purposes, comprising a turbo-expander 17 on line 18, an electrical generator 20 being driven by said turbo-expander to generate electricity, a methanol injection means 40 acting as the water extractor connected to a methanol tank.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 39-42, are rejected under 35 U.S.C. § 103(a) as being unpatentable over CA 1274399 in view of U.S. 6638413 (Weinberg et al). CA 1274399 discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the concept of using the produced energy to energize a processed gas generator which will produce electrolyzation and store a processed gas (hydrogen) for fueling vehicles. Weinberg et al is relied upon to disclose a method for using electricity for electrolyzing water to produce hydrogen and oxygen (note abstract). It would have

been obvious at the time the invention was made to a person having ordinary skill in the art to use the output electricity of CA 1274399 to drive an electrolyzer as taught by Weinberg et al for the purpose of generating hydrogen and oxygen to be used as fuel.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4942734, US 4711093, US 4707146, US 5596884, disclose the apparatus using turbo-expanders to drive electricity and methanol pumps.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (571) 272-4861. The examiner can normally be reached on Tuesday--Friday from 12:30 AM to 10:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
